
HYBRID TUGBOAT

eTUG +

Crowley has designed the next-generation, fully electric eTug+, a hybrid ship assist and escort tugboat. Building upon the expertise and insights gained from designing and constructing the original eTug (eWolf), the eTug+ offers a highly efficient and operationally astute design, crafted to comply with the latest CARB regulations on the West Coast.

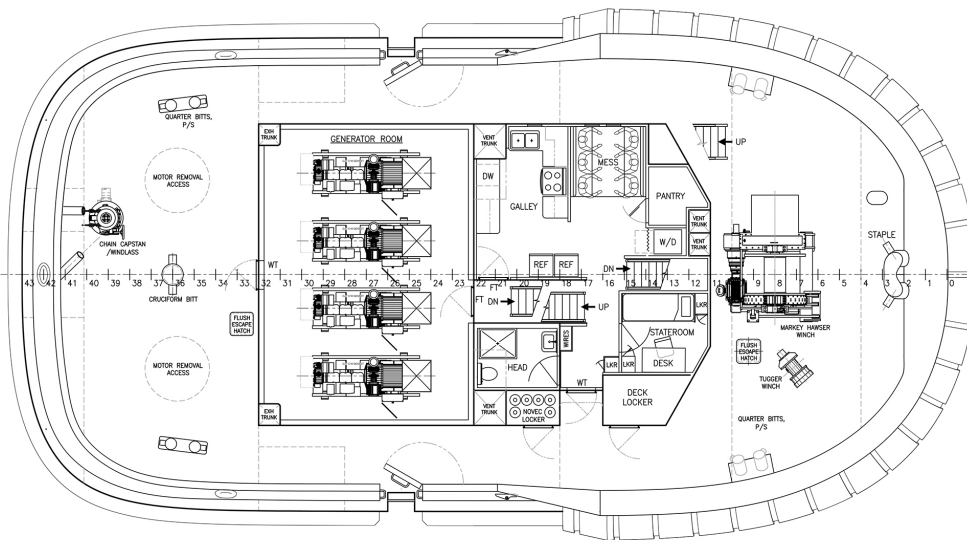

Equipped with advanced azimuth thrusters, the eTug+ can operate in either diesel-electric or fully electric mode, providing exceptional flexibility to accommodate a wide range of ship assist and escort operating profiles. This innovative tugboat represents a significant leap forward in sustainable marine solutions, aligning seamlessly with our commitment to pioneering environmentally conscious maritime technology.

Overall Dimensions

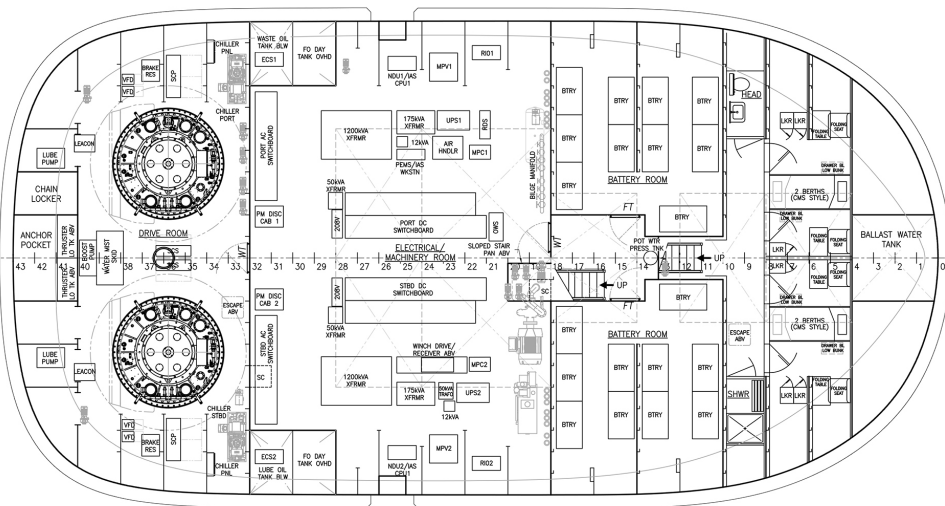

Length Overall.....	89'-10"
Length Molded	86'
Beam Molded	42'
Design Draft	15'
Draft	20.75'
Bollard Pull.....	90 ST
Speed	10 KTS
Gross Tonnage (US)	<200 GRT
Gross Tonnage (IRC)	< 500 GRT
Classification	✱ ABS USCG Subchapter

Specialized Equipment

Diesel Generators	4 x CAT C18 rated at 565 kW/480V
Thrusters	2 x Azimuthing Thrusters
Ships Monitoring & Automation	ABB Pilot Control
Ships Batteries	4520KWh ESS Corvus Orca
Shore Power	480VAC
Accommodation Space NC	60dB
Fuel Oil (98%).....	20,500 gal.
Potable Water(98%)	4,500 gal.
FW Ballast (100%).....	4,600 gal.
Water Mist	3,800 gal.
