

TES-11244

112' x 44' Escort Tug

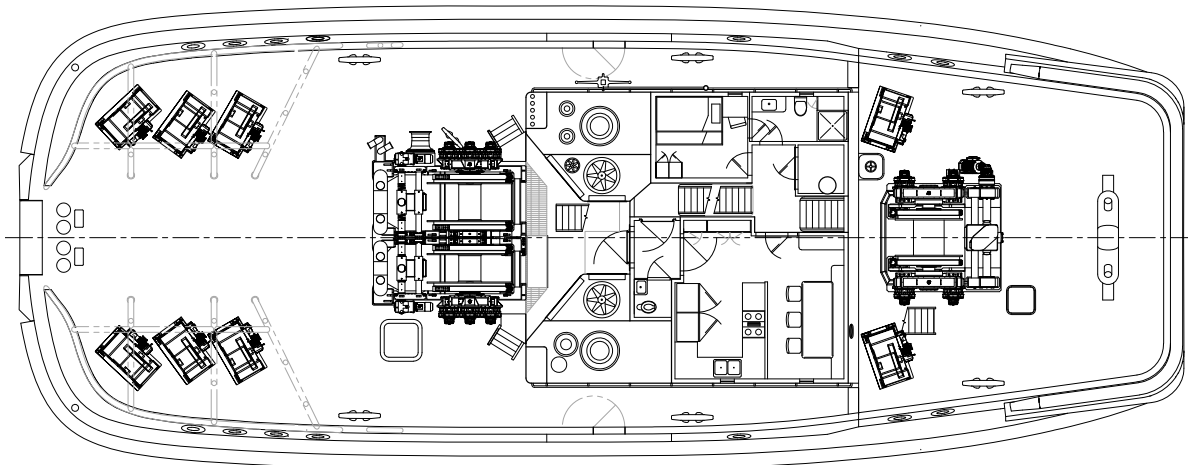

The 112-foot by 44-foot tug was built for escort, ocean towing and ship assist, with firefighting capabilities. The tug features a raised pilot house and a squared forward end. The large, flat bow allows the tug to come up flat against the transom of ocean-going ships. This tug is equipped with eight Wintech 120-ton (SWL) winches for hard wiring to the stern of large ships for escort, a Rapp HA-149H-250 escort winch, and a Rapp double drum AHTW-75H-165 tow winch. The enhanced fuel capacity of 108,000 gallons allows for offshore and rescue tows. The firefighting system has the capability to pump more than 12,000 gallons per minute to fight marine and near shore fires.

Overall Dimensions

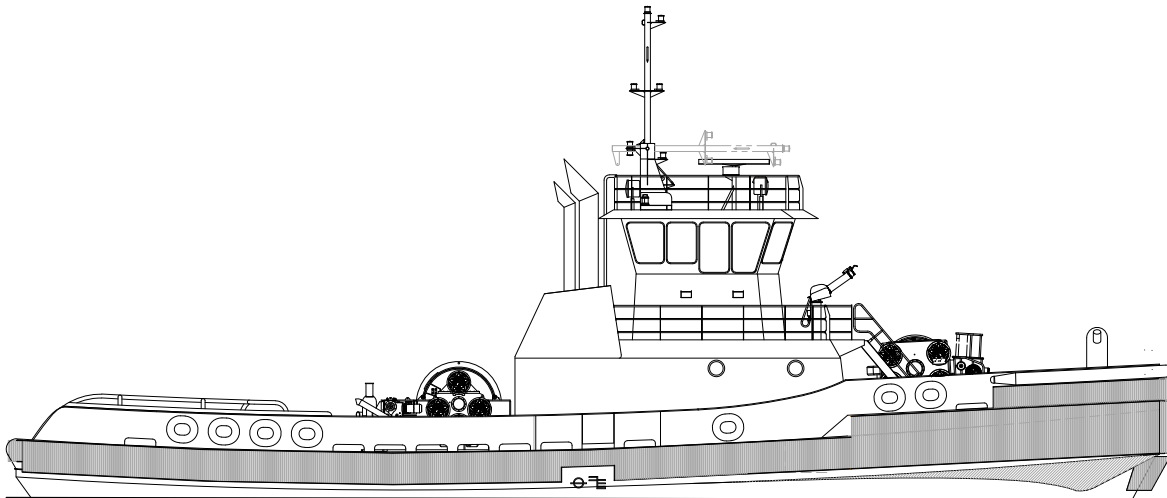

Length	112'	Fuel Capacity.....	108,000 gal
Breadth	44'	Z-Drives	Rolls Royce 305
Draft	22'	Firefighting	FIFI 1
Bollard Pull (est.).....	115 ST	Bow Hawser Winch....	Rapp, Single-drum (hold up to 276 ST of tension)
Horsepower	8,448 HP	Aft Tow Winch	Rapp, Double-drum (pulling 82 ST on first layer)
Main Engine	2 x GE 12v250 TIER IV	Berths	9-10
