

FTR-18848

188' RSW Trawler Concept

The 188' RSW Trawler Concept is designed for shoreside delivery and has significantly larger holds than the found on the 157' RSW Trawler Concept. This vessel is also configured for towing cod-ends, with about 75-80 MT of bollard pull. Like the 157' Trawler, this vessel has its engine room and house forward, with holds amidships with storage and steering aft.

Crowley's engineering services team delivers a full range of marine and engineering solutions. This includes detail and conceptual design, shipyard management, and on-site consulting services for all types of marine projects anywhere in the world. Our vessel design and marine engineering services are both extraordinary and cost effective. No matter the size and scope of your marine project, our professionals will help you achieve your objectives in the safest and most efficient manner possible.
