

FVC-05823

58' x 23' Fishing Vessel

The 58' x 23' seiner design is Jensen's most popular limit seiner, with more hulls built than any other design. Operators consistently praise its good seakeeping and efficiency. These vessels balance fuel economy with hold capacity for operators looking for a more traditional vessel than the latest super-wide vessels.

Crowley's engineering services team delivers a full range of marine and engineering solutions. This includes detail and conceptual design, shipyard management, and on-site consulting services for all types of marine projects anywhere in the world. Our vessel design and marine engineering services are both extraordinary and cost effective. No matter the size and scope of your marine project, our professionals will help you achieve your objectives in the safest and most efficient manner possible.
