

FVC-11731

117' Crabber

This vessel was designed to fish for crab in the Bering Sea, and has the ability to adapt for other fisheries such as long lining and tendering with the addition of RSW machinery. The basic design was lengthened to create the 140' x 38' House Aft Crabber.

Crowley's engineering services team delivers a full range of marine and engineering solutions. This includes detail and conceptual design, shipyard management, and on-site consulting services for all types of marine projects anywhere in the world. Our vessel design and marine engineering services are both extraordinary and cost effective. No matter the size and scope of your marine project, our professionals will help you achieve your objectives in the safest and most efficient manner possible.
